OBJECTIVE

I am a computer science enthusiast with a keen interest in both technical and business aspects. With hands-on experience in web development, I am eager to contribute my skills and further refine my expertise in a dynamic, growth-oriented environment. My goal is to apply my technical knowledge to solve complex problems while continuously improving my leadership and problem-solving abilities.

PERSONAL PROJECTS

Real Estate Web

- Built a responsive real estate platform with React.js and Django Rest Framework (DRF).
- Developed dynamic property search, filtering, and seamless navigation using React Router.
- Designed and implemented RESTful APIs for efficient property management.

Finance Tracker Application

A responsive app to manage income and expenses with real-time insights.

- Built with React.js for the frontend and Django Rest Framework (DRF) for the backend.
- Implemented CRUD functionality with income/expense categorization.
- Developed RESTful APIs for seamless transaction management.

A Blogging Website

- Developed a blogging platform using React.js for the frontend and Django Rest Framework (DRF) for the backend.
- Implemented CRUD functionality for posts, comments, and user profiles.
- Utilized React Router for smooth navigation and an enhanced user experience.
- Integrated responsive design for seamless accessibility across devices.
- Built RESTful APIs with DRF to handle content management and user interactions.

EDUCATION

University Of Sindh | 2020-2024
Bachelor of Computer Science

Saeed Pur College | 2017-2019
Intermediate

CERTIFICATES

CS50 Harvardx
An online course offered by Harvard University

ICT & IEEE BASED MINI PROJECT
Did a mini project for Machine Learning Course, created a self driving spy car.
